Re: Export Control Policy

Dear Hawker's employees,

It is the policy of Hawker Pacific Aerospace (HPA) to conduct business in compliance with all applicable export control laws and regulations, including the United States (U.S.) laws. An export management and compliance program, of which this policy statement is a part, is designed particularly to ensure compliance with U.S. export controls.

Export compliance is the responsibility of all HPA's personnel. HPA is committed to export compliance by ensuring that compliance is an important aspect of our corporate culture and that the requirements and disciplines to comply are integrated into every employee's job and our business processes. It is expected that HPA's employees and contract personnel will be trained in the requirements, policies, and procedures to ensure HPA's compliance to prevent even inadvertent violations.

Any questions concerning the legitimacy of any transaction, violation, or potential violation of the U.S. laws and regulations governing exports and re-exports should be immediately referred to the Export Control Manager (ECM) or in his absence to the ECM Deputy.
